

♈ TAURUS FIXED-EARTH  
♉ GEMINI VARIABLE-AIR  
♊ CANCER CARDINAL-WATER  
♋ LEO FIXED-FIRE  
♌ VIRGO VARIABLE-EARTH  
♍ SCORPIO FIXED-WATER  
♎ LIBRA CARDINAL-AIR  
♏ SAGITTARIUS VARIABLE-FIRE  
♐ CAPRICORN VARIABLE-EARTH  
♑ AQUARIUS FIXED-AIR  
♒ PISCES VARIABLE-WATER

**HOW TO NAVIGATE:**  
this 2020 calendar is essentially the gregorian calendar laid out circularly, with a few changes, instead of starting on January 1st 2020, it starts on the winter solstice (December 21) of 2019, rather than depending on the 12 month system for orientation the solstices, equinoxes and sun transits through the zodiac are more prominent compasses for time navigation.

lizards, sharks, deer, humans, racoons, mice, and tigers. they are schrodinger's cat.  
without observation they are both dead and alive, and can transform into anything with a central nervous system.  
this image holds space for the paradox of 2020, there are children in cages at the "u.s." "mexico" border. there are so many people of all ancestries healing their lineages. jesus came back and so did the police state. in honor of all that we are creating in love and in integrity, i invite you to hold 2020 in the sacred space that is your palms.  
before they begin to take on different features according to their species. these creatures are about to become horses, whales,  
but stagnant.

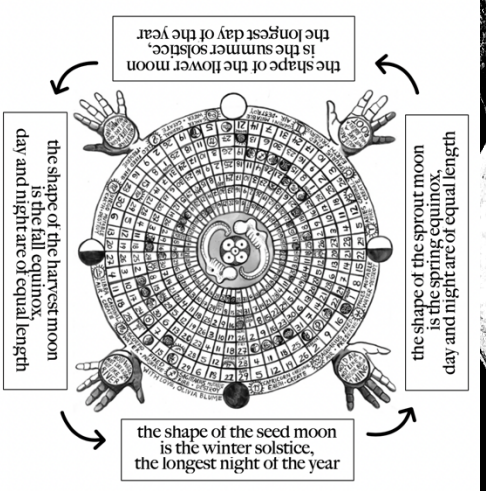

when an egg and a sperm cell first merge in animals they form a "zygote," the nucleus appearing as a dark dot in a circle, a symbol often used for our solar systems sun. soon this sun-cell begins to divide exponentially, simultaneously un-becoming and becoming. after these swelling cells begin to specialize the developing organism is referred to as an embryo (etymology: into swelling).  
the creatures in the center of the 2020 calendar are embryos with spinal chords (vertebrates) in the last stage before they begin to take on different features according to their species. these creatures are about to become horses, whales,

**time is a sine wave**  
(among many other things)

a sine wave is a continuous periodic oscillation; think a heart beat, the ups and downs and ups and downs of life, waves on a beach, yin yang theory. this kind of oscillation is also observed in the waxing and waning of the moons and the cycles of solstices and equinoxes that consistently happen over and over again.

i wonder, when we live in a paradigm where time is not seen as linear and rather as a sine wave (among other things), do the ups and downs in our lives feel as violent? does depression go so low, or anxiety so high? do times of "unemployment" feel like lapses in identity or a time to fortify our creative processes? preparing us for the next climb before the inevitable fall?

with love,  
olivia blume,
